

Pre testing instructions:

- This is a usability test on our driving assistant
- We will emulate the assistant during the entire test and we won't be able to talk to you person to person unless necessary
- There's two methods of communication that this assistant supports: a real time helper and a post-trip review. At default, we shall emulate the real time assistant, but you have the option to instruct the assistant to cease functions to give a post-trip review.

Test: Real time (10 mins)

- Phrases are in <https://docs.google.com/spreadsheets/d/1nIri3BMcE8CbJ5P6chTAhCLqw3clXevOPCGDiB-8SwE/edit#gid=0>

Post interview questions:

How do you feel about the real time assistant?

Were there any phrases that were annoying?

Were there any phrases that were useful?

Are there any features you'd like to be implemented?

What would you change about it?

How do you feel about relying on a real time assistant if it was an automaton?

How do you feel about the post-drive summaries?

How do you see this assistant affecting the ways that people drive?

How do you feel about autonomous vehicles?

How would you rate yourself as a driver from 1-10? Why?

What do you think new drivers would feel about this assistant?

(If your driver did not choose the Wait Till the End Option)
